PRODUCT AND SHALL BECOME EFFECTIVE NO LATER THAN SIX MONTHS FROM THE LAST  
REVISION DATE.

# NAS9300-200

Long Term Archiving and Retrieval  
of digital technical product documentation  
such as 3D, CAD and PDM data

**PART 200: Fundamentals and Concepts for Long Term Archiving and  
Retrieval of Products Structure Information**

ISSUE DATE: DECEMBER 31, 2017 REVISION DATE:

THIRD ANGLE PROJECTION		CUSTODIAN <b>ENGINEERING MANAGEMENT COMMITTEE</b>	REVISION <b>NEW</b>
PROCUREMENT SPECIFICATION	NONE	TITLE <b>LONG TERM ARCHIVING AND RETRIEVAL OF DIGITAL TECHNICAL PRODUCT DOCUMENTATION SUCH AS 3D, CAD AND PDM DATA PART 200: FUNDAMENTALS AND CONCEPTS FOR LONG TERM ARCHIVING AND RETRIEVAL OF PRODUCT STRUCTURE INFORMATION</b>	CLASSIFICATION STANDARD PRACTICE <b>NAS9300-200</b> SHEET 1 OF 41

## FOREWORD

1. This standard was prepared jointly by AIA, ASD-STAN, PDES, Inc., and the PROSTEP iViP Association.
2. The PROSTEP iViP Association is an international non-profit association in Europe. For establishing leadership in IT-based engineering it offers a moderated platform to its nearly 200 members from leading industries, system vendors and research institutions. Its product and process data standardization activities at European and worldwide levels are well known and accepted. The PROSTEP iViP Association sees this standard and the related parts as a milestone of product data technology.
3. PDES Inc is an international non-profit association in USA. The mission of PDES Inc is to accelerate the development and implementation of ISO 10303, enabling enterprise integration and PLM interoperability for member companies. PDES Inc gathers members from leading manufacturers, national government agencies, PLM vendors and research organizations. PDES Inc. supports this standard as an industry resource to sustain the interoperability of digital product information, ensuring and maintaining authentic longevity throughout their product lifecycle.
4. Readers of this standard should note that all standards undergo periodic revisions and that any reference made herein to any other standard implies its latest edition, unless otherwise stated.
5. The Standards will be published under two different standards organizations using different prefixes. ASD-STAN will publish the standard under the number EN 9300–200. AIA will publish the standard under the number NAS9300–200. The content in the EN9300 and NAS9300 documents will be the same. The differences will be noted in the reference documentation (i.e. for EN9300 Geometric Dimensioning & Tolerancing will be referenced in ISO 1101 and ISO 16792, and for NAS9300 the same information will be referenced in ASME Y14.5 and Y 14.41). The document formatting etc., will follow that of the respective editorial rules of ASD-STAN and AIA.

## TABLE OF CONTENTS

1	PREFACE .....	5
1.1	Justification .....	5
1.2	Long Term Archiving and Retrieval of PDM data in NAS9300 context .....	5
1.3	Location in NAS9300 document structure .....	5
2	Scope .....	6
2.1	PDM data in NAS9300 context .....	6
2.2	Objectives and scope of application .....	7
2.3	Out of Scope .....	8
3	Normative References .....	9
4	General Terms, Definitions and Abbreviations .....	9
4.1	General Terms and Definitions.....	9
5	Applicability .....	13
6	Fundamentals and concepts for long term archiving and retrieval of PDM data .....	13
6.1	Usage of basic NAS9300 principles.....	13
6.2	Unique identification.....	15
6.3	Retention trigger points .....	15
6.4	Data to be retained .....	15
6.5	PDM and Product Life Cycle Stages .....	18
6.6	Display / re-use of LTA&R format in active PDM systems .....	22
7	Requirements for customization of off-the-shelf PDM systems .....	22
8	Methods of implementation of the given requirements.....	22
8.1	Configured Baselines .....	23
8.2	Process Documentation .....	24
8.3	Essential Data in Relation to Business Scenarios to Be Supported .....	24
8.4	Qualification methods for long term archiving and retrieval of PDM data .....	26
9	Preservation Planning for archived PDM information .....	28
9.1	Preservation Planning Introduction .....	28
9.2	General Provisions.....	29
9.3	Change Management.....	31
9.4	Configuration Management .....	32
9.5	Data Management.....	33
9.6	Product Structure Management .....	33
9.7	Product Data Database .....	34
10	Administration and monitoring.....	34
11	Definition of Archive Information Packages for PDM Data .....	35
11.1	General .....	35
