
Study n°: 8.6027 Draft n°: Final draft Date: 17 May 2005 Step n°: 11

Ref.:

ENGLISH VERSION

Aerospace series

LOTAR

Long Term Archiving and Retrieval of digital technical product documentation
such as 3D, CAD and PDM data.

PART 003: Fundamentals and Concepts

Série aérospatiale

Luft- und Raumfahrt

LOTAR

LOTAR

Archivage long terme et récupération des données
techniques produits numériques
telles que CAD 3D et PDM.

Langzeitarchivierung und Bereitstellung digitaler
technischer Produktdokumentationen
beispielsweise 3D CAD und PDM Daten.

Partie 003: Principes et conception

Teil 003: Grundlagen und Konzepte

Warning

This document is NOT an AECMA Standard. It is distributed for review and comment. It is subject to change without notice and may NOT be referred to as an AECMA Standard.

Recipients of this document are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

Contents

	Page
1	Scope..... 5
2	Normative references..... 5
3	Terms, definitions and abbreviations..... 6
3.1	Introduction..... 6
3.1.1	Invariance..... 6
3.1.2	Objectives for keeping digital data..... 6
3.1.3	Length of time of keeping data 7
3.1.4	Stored Form 7
3.1.4.1	Detail level..... 8
3.1.4.2	Representation 8
3.1.4.3	Format 8
3.2	Terminology 8
3.2.1	Product information model 8
3.2.2	Product model 8
3.2.3	Business Application 9
3.2.4	Retention 10
3.2.5	Long Term Archiving 10
3.3	Scope of EN9300 11
3.4	Relation to Legal Admissibility Standards 12
4	Overview of referenced standards 13
4.1	Introduction to OAIS - ISO 14721 13
4.1.1	The OAIS Environment 13
4.1.2	The OAIS model..... 14
4.2	Introduction to ISO 10303..... 15
4.2.1	ISO 10303, AP 203:1994 - Configuration controlled 3D designs of mechanical parts and assemblies and Edition 2 draft 16
4.2.2	ISO 10303, AP 214 - Core Data for Automotive Mechanical Design Processes and second Edition 16
4.2.3	ISO 10303, AP 233 - System engineering data representation 16
4.2.4	ISO 10303, AP 209:2001 - Composite and metal structural analysis and related design .. 17
4.2.5	ISO 10303, AP 237 - Computational fluid dynamics 17
4.2.6	ISO 10303, AP 210:2001 - Electronic assembly, interconnect and packaging design and Edition 2 draft 17
4.2.7	ISO 10303, AP 212:2001 – Electro technical design and installation..... 17
5	Fundamentals and concepts..... 18
5.1	Overview..... 18
5.2	Processes..... 19
5.3	Data..... 19
5.3.1	Archiving Product Models vs. Archiving Documents 19
5.3.2	Data content..... 21
5.3.2.1	Definition of the core model..... 21
5.3.2.2	Meta data..... 22
5.3.2.3	Definition of digital (engineering) signatures..... 23
5.3.3	Data formats..... 23
5.3.3.1	Native 3D model geometry representation 23
5.3.3.2	Archive format 23
5.3.3.3	Archive signatures 23
5.3.3.4	Digital (engineering) signature 23
5.3.3.5	Digital time signature 24
5.3.3.6	Information packages - Preservation Description Information (PDI)..... 24
5.3.4	Archiving approach for complex product models 24
5.3.5	Data quality assurance 24
5.3.5.1	Definition of validation properties 25
5.3.5.2	Definition and application of verification rules 25
5.3.6	Process phases and cycles..... 26
5.4	Mapping approach onto physical data representations..... 28
5.5	Fundamentals for testing the LOTAR process and components..... 29

5.6	System Architecture Framework	30
6	Description Methods	31
7	Applicability.....	32

Figure Index

Figure 1: Example for retrieve use case for specification of long term retention	10
Figure 2: Retention and Long Term Archiving	11
Figure 3: Scope of EN9300 (←———— mandatory; ← — — optional)	12
Figure 4: OAIS Environment.....	14
Figure 5: Functional Model of OAIS	14
Figure 6: Overview about Structure of ISO 10303.....	15
Figure 7: Application example, formal schema definition and mapping onto Part 21 file format	16
Figure 8: Distinction of Business requirements, Business Cases and Use Cases	18
Figure 9 Scope definition for EN9300 (gray marked rectangle)	19
Figure 10: Concept of a core model	22
Figure 11: Concept of validation / verification.....	25
Figure 12: Overview of data conversion and data definitions.....	26
Figure 13: Explicit process example	27
Figure 14: Special Use Cases	28
Figure 15: Mapping approach onto physical data representation	28
Figure 16: Data validation by comparison of defined validation properties.....	30
