## **ENGLISH VERSION**

### **Aerospace series LOTAR**

### **L**ong Term Archiving and Retrieval of digital technical product documentation such as 3D, CAD and PDM data **P**art 110: CAD mechanical 3D Explicit geometry information

#### **Série aérospatiale LOTAR**

**Archivage Long Terme et récupération  
des données techniques produits numériques,  
telles que CAD 3D et PDM  
Partie 110 : Archivage long terme et récupération  
des informations CAO "géométrie 3D Explicite"**

#### **Luft- und Raumfahrt LOTAR**

**Langzeitarchivierung und Bereitstellung  
digitaler technischer Produktdokumentationen,  
beispielsweise 3D CAD und PDM Daten  
Teil 110: Explizite Geometrie**

*This "Aerospace Series" Prestandard has been drawn up under the responsibility of ASD-STAN (The AeroSpace and Defence Industries Association of Europe - Standardization). It is published for the needs of the European Aerospace Industry. It has been technically approved by the experts of the concerned Domain following member comments.*

*Subsequent to the publication of this Prestandard, the technical content shall not be changed to an extent that interchangeability is affected, physically or functionally, without re-identification of the standard.*

*After examination and review by users and formal agreement of ASD-STAN, it will be submitted as a draft European Standard (prEN) to CEN (European Committee for Standardization) for formal vote and transformation to full European Standard (EN).*

*The CEN national members have then to implement the EN at national level by giving the EN the status of a national standard and by withdrawing any national standards conflicting with the EN.*

**Edition approved for publication**

**30 April 2012**

Comments should be sent within six months  
after the date of publication to  
ASD-STAN

**Engineering Procedures and  
Processes Domain**

Foreword .....	2
<b>1 Scope .....</b>	<b>5</b>
1.1 Introduction.....	5
1.2 In scope .....	5
1.3 Out of Scope .....	5
<b>2 Normative references .....</b>	<b>6</b>
<b>3 Terms, definitions and abbreviations.....</b>	<b>6</b>
<b>4 Applicability .....</b>	<b>6</b>
<b>5 Business Specifications for the long term archiving and retrieval of CAD mechanical 3D explicit geometry information .....</b>	<b>7</b>
5.1 Introduction.....	7
5.2 Description of use cases for retrieval of CAD mechanical 3D explicit geometry.....	8
<b>6 Essential Information of explicit geometry.....</b>	<b>9</b>
<b>7 Definition of Core Model for an explicit geometry .....</b>	<b>9</b>
<b>8 Verification rules of explicit geometry .....</b>	<b>10</b>
8.1 Introduction.....	10
8.2 Level of Verification .....	10
8.3 Geometrical verification rules and appropriate thresholds .....	11
8.3.1 Verification rules .....	11
8.3.2 Evaluation of the values of thresholds .....	11
8.4 Results of the Verification .....	13
8.4.1 Status information.....	13
8.4.2 Verification reports.....	13
<b>9 Validation rules of an explicit geometry .....</b>	<b>14</b>
9.1 Introduction.....	14
9.2 Level of Validation.....	14
9.3 Comparison of the Geometrical Validation Properties (GVP).....	15
9.4 Results of the Validation.....	15
9.4.1 At the ingest process (qualify) .....	15
9.4.2 At the retrieval process (comparison).....	16
9.4.3 Validation reports .....	17
<b>Annex A (informative) Description of Use cases for Long Term Archiving and Retrieval of CAD 3D explicit geometry .....</b>	<b>18</b>
<b>Annex B (informative) Definition of explicit 3D shape as advanced boundary representation according ISO 10303-514 (informative).....</b>	<b>23</b>
<b>Annex C (informative) Recommended verification rules level 1 and 2 (informative).....</b>	<b>26</b>
C.1 Method used to define verification rules level 1 and 2.....	26
C.2 Verification rules level 1 and 2.....	28
<b>Annex D (informative) Illustration of qualification reports (informative) .....</b>	<b>30</b>
<b>Annex E (informative) Illustration of CAD 3D geometry validation properties .....</b>	<b>31</b>
E.1 The validation property Centre of Gravity, Volume and Area.....	31
E.2 The validation property "Cloud of Points".....	32

## Figures

Page

Figure 1 — Illustration of the major generations of CAD systems .....	7
Figure 2 — Links between Use Cases, essential information and EN 9300 1xx parts .....	8
Figure 3 — No Edge Gap.....	12
Figure 4 — Unacceptable Edge Gap.....	12
Figure B.1 — Illustration of a manifold solid brep .....	23
Figure C.1 — Method for definition of Verification Rules.....	26
Figure E.1 — Illustration of the Centre of gravity of solids.....	31
Figure E.2 — Illustration of the Volume and Area .....	31
